ElectroMart India – Online Electronics Store

Project Overview

- This project is a simple **ElectroMart India e-commerce webpage** developed using **HTML and CSS**.
- The website displays different electronic products such as smartphones, laptops, smartwatches, and accessories in a clean and organized layout.
- The webpage includes a **navigation bar, product listing section, search bar, and footer section** to improve the user experience and provide a simple online shopping interface.

Features

Navigation Bar

The navigation bar contains:

- Website logo/name (ElectroMart India)
- Product search bar
- Login button

Product Section

The main section displays various electronic products in card format including:

- Realme X7 5G
- Smart LED TV
- Power Bank
- Mechanical Keyboard
- Smart Watch
- Gaming Mouse
- RealmeBook Laptop
- Tablet

Each product card includes:

- Product image
- Product name
- Price
- Add to Cart button

Footer Section

The footer provides additional information about the website.

Sections included:

About

- About Us
- Careers
- Contact Us
- Corporate Information

Social Media

- Facebook
- Twitter
- Instagram
- YouTube

Help

- Your Account
- Cancellations & Returns
- Payments
- Shipping
- Terms of Use
